

CARE PLAN

Wowza Solutions Engineering Services

Wowza Solutions Engineering Services gives you extended access to certified Wowza experts who help design, configure, and optimize your streaming environment so you can go live quickly and scale with confidence. Leverage senior Wowza streaming architects and engineers for custom deployments, architecture design, and strategic initiatives.

You don't need a detailed spec on day one. Secure expert capacity now and direct it toward the most important initiatives as they emerge.

Architect + Optimize with Flexibility
Focus on reliability, cost efficiency, and faster time to market

Trusted by:

Wowza Solutions Engineering Services are expert-led services responsible for designing, implementing, and operationalizing production-grade streaming workflows. Certified Wowza engineers deliver tailored, outcome-oriented engagements that help customers confidently move from concept to scalable production.

Ways To Use This Plan

- ✓ Validate architecture with senior engineers
- ✓ Optimize Kubernetes and containerized deployments
- ✓ Develop and integrate custom modules
- ✓ Review performance capacity before major launches

What You Get With The Care Plan

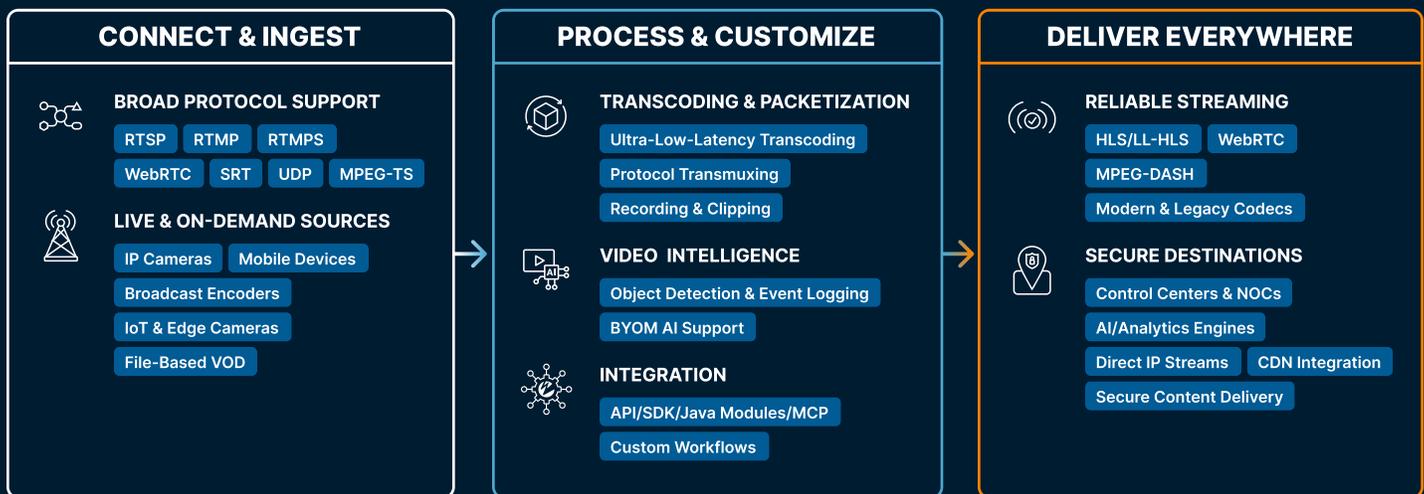

- ✓ Priority access to Wowza architects and senior engineers
- ✓ Flexible expert hours for strategy, design, configuration, or development
- ✓ Reference architectures, tuned configurations, and custom code

Why Partner With Wowza Solutions Engineering Services?

- 1 Accelerate Time-To-Market**
Build & Launch Quickly
Trust Wowza Streaming Enging experts to build, test, maintain, optimize, and deploy your media infrastructure. Give your developers the tools and resources they need to succeed and go live with new functionality in a matter of days.
- 2 Build Custom Logic**
Integrate & Extend Capabilities
Integrate Wowza Streaming Engine with third-party VMSs, storage systems, analytics engines, CDNs, identity providers, or observability tools. Wowza's Solutions Engineering Services ensure that your custom workflows are tested and reliable.
- 3 Focus On Your Business**
Efficiently Allocate Resources
Wowza is the backbone for high-volume ingest, distributed cameras, inconsistent networks, and environments where failure is not an option, letting you focus your business staff and resources on where it matters most: satisfying customers.

Deploy Wowza Streaming Engine On Your Terms

On-premises	Air-Gapped	Offline	Hybrid	Edge	Docker
Kubernetes	GPU	Private Cloud	Public Cloud	x86	ARM

“I was looking for a partner who could help me in terms of solving a problem. With Wowza, it’s not just about technology. It’s about building relationships, it’s about understanding the customer problem, and investing in that customer problem.”

Hapreet Singh, Child Health Imprints

“We engaged with Wowza to support low-latency streaming to thousands of attendees with in-player language selection for eleven simultaneous translations and multiple live stenographer captioning options. This allowed users to conduct their business virtually during the height of the pandemic using a new custom-built web platform.”

Felipe Giannazzo, Freeman
